*Detailed Action*

This is the first Office Action corresponding to original filing. Claims 1-4 are active.

*Drawings*

The drawings have been accepted by the examiner.

*Claim Rejections - 35 USC § 102*

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Barrett et al. (Pat No 6,182,580).

The patent to Barrette et al. shows a circular device comprising a series of fingers (22) separated by a slot (23), wherein the outer area of the fingers has an enlarged area (see Fig 1).

*Allowable Subject Matter*

Claims 2-4 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The following is a statement of reasons for the indication of allowable subject matter: one of the art of record shows a device comprising a circular element having fingers separated by a slot, the fingers having an enlarged area at its outer end, and the outer edge defining parallel lines perpendicular to a straight line.

*Conclusion*

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Cameron (4,279,105) shows cards secured together, Rixen et al. (5,570,971) and Curbelo et al. (6,615,523) show connecting means similar to the one recited here.
